

## Assembly Instructions

## To begin

## Tools and materials needed

－Ruler－scissors－blade cutter or＂Exacto－knife＂－awl or other pointed tool（for making a folding crease）－felt pen －pin set－glue－hand towel（ for cleaning your fingers）－ dictionary or other heavy book（ to press the papers flat）．

## －Items of Caution

＊Take care when using sharp or pointed objects or when using bladed cutting tools．Place a heavy sheet of paper under the paper you want to cut．
＊Use glue and other adhesives only in well－ventilated areas．
＊When printing，use a slightly reduced font size．There may be differences in dimensions，depending on the type of printer used．

## How to assemble

＊Follow the working method and markings carefully． ＊Cut carefully along the outter line with cutting blade， Exacto－knife or scissors．

## One－point Advice

＊Cut carefully with cutting blade，Exacto－knife or scissors．
＊For folding parts，first use an awl or other pointed tool to make a light crease along the dotted or solid line．This will make the folds straight．Avoid making strong creases，as this will cause the paper to tear．
＊As an adhesive，white wood glue is recommended． Avoid over application as this may cause the paper to wrinkle．
＊Before beginning assembly，test adhesive amounts on extra paper．
＊Occasionally，white spots will be apparent on folds and cuts．Use a marker or pencil to fill in these spots． It is recommended that this be done after each stage of assembly because coloring becomes more difficult once parts are assembled．

## Basic working method and markings

—— Solid lines
Fold along these lines． The printed surface should be on the outside of the folded shape．

－－－－－－－－－Broken lines
Fold along these lines．
The printed surface should be on the inside of the folded shape．

－－－ー－ー－ー．Dotted line Cut along these lines．

Do not fold or cut the parts marked $\boldsymbol{X}$ ．

Cut out parts marked with an asterisk（＊）．

Red dots are the reference positions for gluing surfaces．

## $\longrightarrow$

Please glue them by aligning the red and red／blue and blue parts if they are marked on the paper．

## 5 Assembling the Steering

First, assemble each component by following the working method and markings. Then, refer to the illustration and photos below to glue the parts together.

Indication of Working Methods
$--->$ Fold or Curve $\longrightarrow$ Glue

## Steering 1

Sheet E, 7 parts in total

Fold each relevant part according to the assembly symbols.
Please use the dots on each component as reference when gluing surfaces.

Reference photo

## Steering2

Sheet E, 7 parts in total
Glue in order from(1) to 4 on the graphic.

## 5 Assembling the Steering

First, assemble each component by following the working method and markings. Then, refer to the illustration and photos below to glue the parts together.

## Steering3

Sheet E, 14 parts in total
Fold each relevant part according to the assembly symbols.
Please use thedots on each component as reference when gluing surfaces.

Glue in order from $(1)$ to $\mathbf{6}$ on the graphic.
*Assemble both sides. The diagram shows the left side. The number inside the ( ) is for the right side.
 E-15(16) E-17(18)

## 5 Assembling the Steering

First, assemble each component by following the working method and markings. Then, refer to the illustration and photos below to glue the parts together.

## Steering <br> Sheet E, 74 parts in total

Fold each relevant part according to the assembly symbols.
Please use the dots on each component as reference when gluing surfaces.
Glue in order from (1) to 7 on the graphic.

## 6 Assembling the Headlight

First, assemble each component by following the working method and markings. Then, refer to the illustration and photos below to glue the parts together.

## Headlight

Sheet F, 24 parts in total
Fold each relevant part according to the assembly symbols.
Please use the
dots on each component as reference when gluing surfaces.
Glue in order from(1) to (14) on the graphic.

## 7 Assembling the Fuel Tank

First, assemble each component by following the working method and markings. Then, refer to the illustration and
photos below to glue the parts together.

## Fuel Tank1

Sheet G, 4 parts in total
Fold each relevant part according to the assembly symbols.

Glue in order from $(1)$ to 3 on the graphic.

## Fuel Tank2

Sheet G, 3 parts in total
Glue in order from $\mathbf{1}^{1}$ to 3 on the graphic.

## 7 Assembling the Fuel Tank

First, assemble each component by following the working method and markings. Then, refer to the illustration and
photos below to glue the parts together.

## Fuel Tank

Sheet G, 11 parts in total
Fold each relevant part according to the assembly symbols.
Please use thedots on each component as reference when gluing surfaces.

Connect each of the previously assembled parts in
order from (1)-5 according to the diagram.
